Akash Shinde
Final-Year B.Tech AI & ML Student | *+91-7087473746* | *akashshinde7466@gmail.com* |
LinkedIn: Akash-shinde | *GitHub: Akashshinde84* |

Professional Summary

Final-year B.Tech student specializing in Artificial Intelligence and Machine Learning with expertise in Python, Data Science, Machine Learning, and Deep Learning. Passionate about developing AI-driven solutions for real-world challenges. Strong analytical, problem-solving, and teamwork skills, seeking internship or entry-level opportunities to learn, contribute, and grow professionally.

Education

B.Tech. in AI & ML	**Sanjay Ghodawat University , Kolhapur** | GPA : 7.00	*2023 – Present*
HSC	**New Model Junior College,Kolhapur** | Marks : 55.00%	*2021 – 2023*
SSC	**Seventh-day Adventist Higher secondary School,Kolhapur** | Marks : 75.00%	*2021*

Technical Skills

Languages : Python,C++,SQL
Core CS : Data Structures & Algorithms
Web & Backend : HTML,Css,Javascript,FastAPI, Flask, REST APIs, Streamlit
Databases : MySQL
ML / AI : LLM Applications, Machine Learning, Deep Learning, NLP, CNNs
Tools : Git, GitHub, Jupyter Notebook, VS Code
Visualization : Pandas, NumPy, Matplotlib, Seaborn, Plotly, Excel
Soft Skills : Analytical Thinking, Team Collaboration, Effective Communication, Problem Solving, Adaptability

Projects

Mother Tongue Bridge | *React.js, Tailwind CSS, FastAPI, Python, MongoDB Atlas, Google Gemini API, Tesseract OCR, gTTS*
[GitHub]

- Developed an AI-powered multilingual learning platform that translates, simplifies, and explains educational content in students' native languages using Google Gemini API..
- Integrated OCR and text-to-speech to extract text from PDFs/images, provide voice-based learning, and enhance accessibility for regional learners.
- Built a full-stack application using React.js, FastAPI, and MongoDB Atlas with features including AI doubt solvxing, learning history, and cloud deployment on Vercel and Render.

Automated-Invoice-Processing-and-Anomaly-Detection | *Python, Machine Learning, Scikit-learn, Streamlit, Pandas, NumPy, OCR*
[GitHub]

- Developed an automated invoice processing system using Python, OCR, and Machine Learning to extract and analyze invoice data from PDF documents and images.
- Implemented invoice data validation, duplicate detection, and anomaly detection using Scikit-learn to identify unusual transactions and potentially fraudulent invoices.
- Built an interactive Streamlit dashboard for invoice uploads, risk scoring, anomaly alerts, data visualization, and downloadable reports to improve efficiency and reduce manual effort.

smart-online-shopping-prediction | *Python, Machine Learning, Scikit-learn, Streamlit, Pandas, NumPy, Matplotlib, Seaborn, SHAP*
[GitHub]

- Developed a machine learning-based shopping prediction system to predict customer purchase intentions by analyzing browsing behavior, session duration, bounce rates, and website interactions.
- Implemented and compared Logistic Regression, Random Forest, Artificial Neural Network (ANN), and Ensemble Learning models, achieving 89.46 accuracy using Random Forest on the test dataset.
- - Built an interactive Streamlit dashboard for real-time purchase predictions, customer segmentation, model performance visualization, and SHAP-based feature explanations to support data-driven marketing decisions.

Certifications

Data Science Master Virtual Internship — AICTE EduSkills | *Siemens*	*July 2026*
Machine Learning Course | *Persevex*	*October 2026*
Deloitte Australia-Data Analysis Job Simulation | *Forge*	*January 2026*
Research Methodology | *NPTEL*	*Jul–Oct 2026*

Extra Curricular Activities

LINUXDIARY 5.0 — Linux and Open-Source Participation

- Gained knowledge and practical exposure to Linux operating systems, command-line tools, and open-source technologies.

Football player(State-level)

- ball Player (State-Level)– Represented the universiy in football competitions, demonstrating discipline, teamwork, leadership, consistency, and strong performance under pressure.
